

## Process Runner Dashboard

# Gain Valuable Usage and Adoption Insights

**The Magnitude Process Runner Dashboard provides a graphical overview of how Process Runner is being used within your enterprise.**

Drill down to record level to understand who is doing what or simply spot a trend within departments, users, systems or processes.

### Information at a Glance

Process Runner Dashboard—a web enabled product—surfaces aggregated usage information collected from all Process Runner users such as volume, error counts, SAP system used, and other metrics to provide insights on adoption and usage.

### Ease of Use

Process Runner Dashboard provides the ability to filter data by date and other parameters to focus on important factors and narrow down problem areas. It also provides the drilldown option to see statuses in greater detail.

### Monitoring System

Easily identify important or negative trends. Enables users to take quick actions and make faster decisions. Drill down to record level to find out who is doing what or spot a trend within departments, users, systems, or processes.

### Strategy Alignment

Management can easily track information to ensure usage aligns with strategic priorities.
